DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Neurofisiologia

2425-1-I0202D149-I0202D141M

Aims

After completing this course, students will have acquired the knowledge and skills of the physiology of higher psychic functions,

Contents

NEUROPHYSIOLOGY: The synapses. The receptors. The proprioceptors. The sensory systems. The resting and action potential. The ion channels. Breathing.

Detailed program

NEUROPHYSIOLOGY

? The synapses

? The receptors

? The muscle-tendon proprioceptors

? The vestibular proprioceptors

? The sensory systems

? Somoesthetic sensitivity

- ? Heat - pain sensitivity
- ? Sight
- ? Hearing
- ? Smell
- ? Taste
- ? The resting and action potential
- ? The ion channels
- ? Breathing (respiratory system development and control of breath)

Prerequisites

Objectives of the course Bases of Movement

Teaching form

4 Lectures 2h/each, in presence and in italian.

Textbook and teaching resource

1. F. Baldissare, Fisiologia e Biofisica Medica, IV Ed., Poletto Ed., 2009

Semester

2nd term

Assessment method

Written exam, integrated with the other teaching units: quizzes with multiple choice questions and an open question with brief answer.

Office hours

By appointment
