COURSE SYLLABUS

Economic History and Microeconomics

2425-1-E1801M061

Learning objectives

The course provides students with the conceptual tools necessary for the examination and interpretation of the main economic phenomena. The final aim is the acquisition of skills related to learning, investigation and analysis, with particular reference to microeconomics and the historical development of economic systems. The students learn to face the problems of the economic systems, demonstrating the understanding of the concepts expressed in the basic literature, also through the recognition of models that exemplify the theoretical concepts. The course also provides students with the conceptual tools and information necessary for the examination and interpretation of the main historical-economic phenomena.

At the end of the course, students are expected to be able to understand the mechanism that lead to market prices, and their role in determining market outcomes, evaluating the consequences in terms of efficiency and equity.

Contents

Global History
Evolution of trade and technology
Evolution of markets
Functioning of markets and market structures
