

## COURSE SYLLABUS

### Global Accounting

2425-1-F7702M033-F7702M116M

---

#### Learning objectives

The course is a practically oriented introduction to financial statement analysis with a global perspective on accounting standards. At the end of the course, students will: (i) understand the role and importance of international financial reporting standards; (ii) understand, interpret and assess the quality of financial statements in light of the principles and rules of US GAAP and IFRS; (iii) be able to apply the main techniques of financial statement analysis to assess business financial performances.

#### Contents

The course starts with a brief overview of the structure and concepts of financial accounting and then introduces students to the interpretation and analysis of its main reports. It develops around the following topics:

- ? Financial reporting scope and mechanics (brief review)
- ? Financial reporting standards in a global perspective
- ? Understanding financial statements
- ? Financial statement analysis
- ? Sustainability reporting in a global perspective
- ? Reporting quality

#### Detailed program

The course is articulated in the following topics:

Financial accounting: scope, users, basic reporting principles and techniques  
Financial statements and their structure

International financial reporting standards: logic and structure

Understanding Financial Statements:

- ? Income statement
- ? Balance sheet
- ? Statement of cash flows

Financial Statement Analysis:

- ? Scope and general framework
- ? Income statement and profitability
- ? Balance sheet, liquidity and solvency
- ? Analytical techniques

Sustainability reporting: introduction with a global perspective

Reporting Quality

## Prerequisites

Basic financial accounting: accounting technique and logic.

## Teaching methods

The course includes formal lectures as well as practice sessions (in-class activities). Formal lectures are meant to provide the theoretical foundations, the main concepts techniques. Practice sessions are meant as applications of theory sessions aimed to highlight the implications of theoretical in cases or exemplified situations.

The instructor may indicate materials that should be read and prepared before classes according to provided guidelines (extra-class activities), with the aim of fostering useful insights and pointing out relevant concepts/issues or breaking down eventual topic complexity.

## Assessment methods

Written exam

## Textbooks and Reading Materials

- ? Textbook: Robinson et al. "International Financial Statement Analysis", Wiley, (3rd ed)
- ? Handouts, readings, and learning resources posted on e-Learning or distributed in class (mandatory, unless differently specified)
