SYLLABUS DEL CORSO

Planning e Consulenza Fiscale e Societaria - 2

2425-3-E1802M123-E1802M135M-T2

Learning objectives

The course aims to provide students with the basic knowledge related to extraordinary business operations, corporate taxation, the determination of taxable income and the company's tax structure. The student will be able to acquire the main methodologies and techniques for the analysis of corporate transactions and taxation that are functional to the business consultancy.

Contents

The tax and corporate planning and consultancy module allows students to deepen the legal, accounting and tax issues related to the sale and the transfer of company, and mergers and demergers, transformation and voluntary liquidation. In addition, an analysis of transfer corporate taxation will be provided with details on the determination of business income and the taxation regime for partnerships and corporations. In consideration of the current health crisis, the effects of COVID-19 will be considered in the context of extraordinary transactions and corporate taxation.

Tax liability and territoriality for supplies of goods and services

Tax base, revenue and deduction

Prerequisites

Passing of the Financial Accounting and Financial Statement examination

Teaching methods

Sessions of frontal teaching, discussion of case studies and carrying out written exercises. Participation and discussion in the classroom on current issues will be stimulated. Some speeches will be organized with testimonies from consultants and practitioners.

Below is the breakdown of the teaching activities included in the course with different teaching methods:

1. 10 two-hour lessons held in person
2. 4 2-hour exercises carried out in interactive mode in person;

3. 2 lessons of 2 hours held in remote delivery mode (remote synchronous).

Should Covid-19 emergency periods arise, the lessons will take place in mixed mode: partial presence and asynchronous/synchronous video-recorded lessons. In this context, lessons will mainly be carried out in synchronous mode, respecting the lesson timetable, as far as possible.

Assessment methods

During the course two intermediate tests (in itinere tests) will be carried out by written tests. The first intermediate test will cover only a first part of the program. Those who pass the first test will have access to the second written test. Students who pass the two written tests will have direct access to the oral exam which will cover the overall program. Those who do not pass the intermediate tests, decide not to support them or do not accept the grade obtained will be able to take the exam in traditional ways.

The written exam consists of a test composed of 6 multiple choice questions (score 0, if wrong or missing, score 1, if exact), one numerical exercise (0-10 scores) and two/three open questions (score may vary from 0 to 6 and from 0 to 8). In order to pass the written exam, it is necessary to obtain a total score of 18. After passing the written test, the student will be able to access the oral exam on the overall program. For those who obtain a score equal to or greater than 21 it will be possible to validate the grade without taking the oral exam.
