SYLLABUS DEL CORSO

Economia del Mercato Mobiliare (blended)

2425-3-E1803M107

Learning objectives

The main goal of the course is the understanding and application of investment strategies for portfolios of financial assets. In particular, the student will be able, using the correct disciplinary language, to:

- understand the functioning of the securities market (microstructure)
- know the economic-technical characteristics of the different asset classes (bonds, shares, mutual funds)
- define asset allocation approaches (portfolio optimization and pricing models)
- apply asset allocation principles in building a portfolio of ETFs
- clarify the differences between modern finance theory and behavioral finance
- understand the relationships between the theory of market efficiency and the assumptions of fundamental analysis (DCF and multiple analysis) and technical analysis
- apply the tools of portfolio performance evaluation

Contents

The course develops an understanding of the role and functioning of securities markets in its two main sectors: the bond market and the stock market.

Besides this basic understanding, participants will have an overview on more specific topics, such as portfolio management strategies, portfolio performance evaluation, market efficiency and behavioral finance. The aim of the course is to allow attending students to acquire the necessary grasp in the use of securities analysis tools

Detailed program

1. Financial markets structure
2. Equity valuation: return and risk measures

3. Bond evaluation: return and risk measures
4. Markowitz portfolio selection theory
5. Capital Asset Pricing Model
6. Portfolio performance evaluation
7. Financial markets efficiency and technical analysis
8. Behavioral finance

Prerequisites

Basic knowledge of statistics and financial mathematics

Teaching methods

The teaching is provided in Blended Learning mode and includes:

- 21 hours of lectures
- 28 hours of autonomous activity to be carried out based on the material provided online (Video lessons / videos /ad hoc readings / websites, use of financial databases)
- 12 hours of class exercises dedicated to technical analysis and the Asset Allocation Contest

During the course delivery period, all students are offered participation (to be carried out in groups) in two specific activities: Asset Allocation Contest and Game Stop case.

Assessment methods

During the course delivery period, the verification of learning takes place:

1. weekly via online activities
2. discussion of the GameStop case
3. with an end-of-course test carried out in the computer lab and structured with 10 closed questions (multiple choice) and 2 open questions.

The grading scale for the test is as follows

- 3 points for correct answers to the multiple choice questions (0 if incorrect)
- 15-30 points for answers to the open-ended questions (12 for no answer)

Example: 10 correct closed questions (30); Open question 1: 20; Open question 2: 30

Test grade= $(30+30+20)/3 = 26.67$

During the official exams, the verification of learning is carried out by means of a written examination.

Written examination: 10 multiple-choice questions + 2 open questions

Grading scale:

-0-3 points multiple-choice questions

-15-30 open questions (12 to no answer)

It will also be possible, at the student's request, to take an oral examination, in addition to the written one, on the teaching material of the course (for both attending and non-attending students)

Up to a maximum of 2.5 points for group works (Game stop and AAC) will be added to the final mark

obtained in the test.
