COURSE SYLLABUS

Sociological and Psychological Principles of Financial Consumer Behavior

2425-3-E1803M124

Learning objectives

Learning objectives

The broad objective of this course is to give students fundamentals of sociology of money and economic psychology.

In details, students will be able to:

Know the basic principles of sociology of money and economic psychology

Have a critical view of what is financial well-being and how to achieve it

Understand basic sociological process – such as financial socialization – which lead somebody to build his/her own's financial wellbeing

Become familiar with psychological bias of financial behaviour (such as mental accounting and loss-aversion)

Understand what is financial education and its relationship with society

Have basic notion on how to design an effective financial education project

Contents

The course explores the principles of sociological and psychological aspect of financial consumer behavior. Starting from the basics of sociology of money and economic psychology, it explores recent research on financial consumer behaviors and financial literacy. It shows main institutional tools and criteria to design and run financial education projects

Detailed program

The course is designed to explore the principles of sociological and psychological aspect of financial consumer behavior. The course has a multidisciplinary approach, focusing mostly on sociology but also on economic psychology and behavioral finance. You will be asked to make exercises, questionnaires, interviews to test your understanding of financial consumer behaviour

It is divided in to three part. In the first part of the course, we will explore the differences between a structural and the cultural approach to sociology of money (referring to the classical works of Mauss, Weber, Simmel, Marx and Bourdieu).

The 2nd part will deal with recent research on financial wellbeing, and why it is hard to do achieve it due to psychological and social constraints) Moving from the works of the Consumer Financial Protection Bureau, we will look at the basic mistakes that customers do when taking financial decision (i.e. cognitive bias) and the constraints that characterize the context in which they live. In the 3rd part, it will show main institutional tools and criteria to design and run financial and insurance education projects

Prerequisites

None

Teaching methods

The course is entirely held in English language. All the lessons take place "live" in the classroom. The course includes: theoretical lectures, reading of papers from peer-reviewed journals, illustration of case histories, discussions and group exercises. More information will be given during the lessons. The class uses discussion as a cornerstone of the college experience. Reading some papers or documents online before the lesson will be recommended each week to participate actively.

Assessment methods

The students assessment will consist of a FINAL WRITTEN EXAM with 6 open questions in English on the texts illustrated in "Required readings" below

During the course delivery period, the verification of learning takes place with: preparation of a group presentation using financial education principles discussed (FINANCIAL EDUCATION- TEAM PRESENTATION EXERCISE)

Up to a maximum of 3 points for group works (FINANCIAL EDUCATION- TEAM PRESENTATION EXERCISE) will be added to the final mark obtained in the test.
