SYLLABUS DEL CORSO

Ulteriori Conoscenze Linguistiche per le Scienze Economico Aziendali I - Spagnolo

2425-2-F7701M072

Learning objectives

KNOWLEDGE AND UNDERSTANDING -

The course aims to consolidate previously acquired linguistic structures, complete the study of major language skills and delve into cultural topics specific to the studies undertaken.

It provides for:

- Acquire a thorough knowledge of the grammatical and syntactic structures of the Spanish language up to level B2.
- Understand written and oral texts in the economic-financial field.
- To know the technical-economic vocabulary and the main expressions used in the context of business and finance in Spanish.

APPLIED KNOWLEDGE AND COMPREHENSION SKILLS

The course aims to:

- Apply linguistic skills to analyse and comment on written and oral texts in the different situations of language use focusing on the linguistic content of business and finance.
- Develop linguistic and cultural understanding of different discourse types by using authentic materials and applied and interactive tools.
- Sustain conversations in different domains using effective communicative strategies in Spanish.

MAKING JUDGEMENTS -

The course aims to:

- Develop critical skills in interpreting and summarising authentic texts in Spanish in the field of economics, evaluating information and data with autonomy.
- Emphasise the use of specialised language by exercising the ability to compare and analyse documents in Spanish, comparing them with those in other languages to identify cultural and terminological differences.

- Recognise and evaluate the most appropriate linguistic register according to the professional and academic context.

COMMUNICATION SKILLS -

You will focus on:

- The ability to express oneself clearly and precisely on economic and financial topics in Spanish, both orally and in writing, taking into account the four skills described by the Common European Framework of Reference for Languages.
- Active participation in discussions and presentations in Spanish, adapting the language and communicative style according to the interlocutor and the professional or academic context.

LEARNING SKILLS -

The student will be able to:

- Develop autonomous strategies for continuous learning of the Spanish language in business and finance.
- Use linguistic resources (dictionaries, glossaries, databases, digital tools) to refine lexical and communicative competence.
- Integrate linguistic and disciplinary knowledge for the effective use of Spanish in the academic and professional career.

Contents

The grammar, lexical and communicative contents of the course correspond to a B2 proficiency level according to the Common European Framework of Reference for Languages (CEFR).

The socio-cultural contents particularly concern the field economics and the respective specific vocabulary of business economics and financial economics, as well as that of tourism, territory and local development in Spanish-speaking countries.

Detailed program

Grammar:

- Revisión de los tiempos del pasado del modo indicativo
- Las perífrasis verbales
- Morfología de los tiempos del modo subjuntivo
- Las oraciones subordinadas:
 - Oraciones sustantivas
 - Oraciones temporales
 - Oraciones finales
 - Oraciones causales
 - Oraciones consecutivas
 - Oraciones concesivas
 - Oraciones de relativo
 - Oraciones condicionales
- Estilo directo e indirecto

Communicative skills and social and cultural contents:

The course aims to provide students with knowledge of the linguistic structures of the Spanish language, with the vocabulary necessary for correct expression both in written and oral form, particularly in the context of commercial, corporate and professional communication in the sector of economy and tourism.

Prerequisites

Level B1 of the CEFR

Teaching methods

The course combines didactic delivery and interactive teaching. Both modalities are used in a complementary manner in order to foster a thorough understanding of the language and communicative skills.

The didactic delivery focuses on face-to-face teaching and the exposition of content, in particular to provide students with the theoretical foundations of the Spanish language and technical-economic vocabulary. Grammatical concepts, syntactic structures and specialised vocabulary are presented through concrete examples and detailed explanations.

The delivery lessons are supported by the use of multimedia resources and teaching materials (presentations, videos, documents) that help make learning more dynamic and accessible.

Interactive teaching emphasises the active involvement of students through hands-on activities, discussions and simulations that aim to develop their communication skills. Interactive lessons are designed to stimulate participation and peer discussion, with the aim of applying the Spanish language in real contexts. The interactive activities encourage critical reflection on cultural and economic aspects related to the use of the Spanish language, facilitating understanding of the differences between the various contexts.

Interactive teaching emphasises the active involvement of students through practical activities, discussions and simulations that aim to develop their communicative skills. Interactive lessons are designed to stimulate participation and peer discussion, with the aim of applying the Spanish language in real-life contexts. The interactive activities encourage critical reflection on cultural and economic aspects related to the use of the Spanish language, facilitating understanding of the differences between the various contexts.

This blended approach, with a clear balance between theory (delivery) and practice (interactive), allows language skills to be developed in a comprehensive and contextualised manner. Interactive teaching helps build communicative skills, while didactic delivery provides the tools necessary to understand and use language in a formal and technical manner.

It includes

- 9 two-hour lessons taught in delivery and interactive face-to-face mode
- 1 two-hour lesson taught in delivery and interactive remotely mode (synchronous)
- 1 one-hour lesson taught in delivery remotely mode (synchronous)

Assessment methods

The assessment consists of various tests designed to measure language skills in academic and professional contexts.

The methods of assessment vary between attending and non-attending students:

- Attending students: Assessment takes place in itinere through written tests and oral exercises during the course.

- Non-attending students: The assessment consists of a written test and a final oral test.
Important note: The oral test can only be taken if the written test is passed with a minimum mark of 18/30.
The test methods include:

1. Written test - Assessment of grammatical, lexical and reading comprehension skills.
2. Oral examination - Assessment of communicative skills and use of the language in specific contexts.
3. Assessment of in-progress activities - Active participation during lectures with expositions, debates and professional simulations.

Attending students:

- Final written examination (45%)
- Assessment of oral activities in itinere (40%)
- Active participation and work carried out during the course (15%)

Non-attending students:

- Final written examination (50%)
- Final oral examination (50%)

Identical structure to that for attending students, but with greater weight on the overall assessment.

The written test consists of closed (multiple-choice) questions to test preparation on the grammatical and lexical contents of the examination programme.

The oral test consists of an interactive interview on the socio-cultural content of the syllabus (material available on the course e-learning page) in which comprehension and oral expression skills on current topics in the field of economics and society are assessed.

Assessment criteria

Assessment outcomes

- Final grade expressed in thirtieths.
- To pass the course, you must obtain at least 18/30.
