DEGLI STUDI DI MILANO-BICOCCA

COURSE SYLLABUS

Experiences of Methodology of Research

2425-3-E2401P128

Learning area

KNOWLEDGE ABOUT QUALITATIVE AND QUANTITATIVE RESEARCH METHODOLOGY

Learning objectives

Knowledge and understanding
Knowing the different research methods in various domains of psychology

Applying knowledge and understanding
Identify the different research methods through the participation to psychology experiments

Contents

Detailed program

A first encounter at the beginning of the year will consist in presenting briefly the different research methods and the different steps involved in participating to psychology experiments.

Participation to psychology experiments for a total of 10 hours.

A second encounter at the end of the year to share and discuss some of the research experiences.

Prerequisites

For the academic year 2024/2025 it will not be possible to select this activitit as a single-course entry.

Teaching methods

Presentation of examples of research in different domains of research and participation to some of these research (didattica interattiva)

Assessment methods

Control of participation to the different encounters and to experiments (for the experiments, use of the Sona System, the experiment management system).
