

UNIVERSITÀ DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Modelli di Colloquio

2425-3-E2401P134

Learning area

Knowledge about qualitative and quantitative research methodology

Learning objectives

Knowledge and understanding

General themes and methodological approaches regarding a psychological diagnosis Clinical reasoning Data organisation

Applying knowledge and understanding

The different contexts in which a clinical interview is used
Ability to extrapolate data and formulate hypotheses from reading/listening to patient protocols Writing a report

Contents

The course aims to support the acquisition of fundamental knowledge about the theory and technique of psychological interview. Starting from the different areas of use of the instrument, will be present the typologies of interview and the instruments and the interview techniques (listening, observation and techniques of the question), particularly in the clinical context. A specific attention will be given to the issue of the relationship with the patient and to the formulation of clinical hypothesis on the case.

Detailed program

Theoretical fundamentals and methodological approaches regarding a psychological diagnosis The different typologies of interview

The different contexts in which a clinical interview is used

Interview Techniques

The clinical reasoning

The diagnostic alliance

The clinical interview

The interview for the bio-psycho-social data

The interview with the parents

The interview with the children

The interview with the adolescents

The counseling interview

The therapeutic interview

Prerequisites

Nothing specific. A good knowledge of the basis of Psychology enables a more aware use of the course contents.

Teaching methods

All lessones will be held in person.

In addition to classroom lectures (about 70%), part of the teaching will take place through the discussion of case studies and audio material.

The material (slides and, when possible, scientific articles) is made available on the e-learning site of the course, so that it can also be used by non-attending stud

Assessment methods

The exam is written, and includes two open-ended questions.

The questions are intended to ascertain the effective theoretical knowledge of the students.

The evaluation criteria are: the correctness of the answers and the critical knowledge of the learned concepts.

For those students who request it, an oral interview is also provided, on all the topics of the course.

Textbooks and Reading Materials

Del Corno F., Lang M., Menozzi F. (2017). Modelli di colloquio in psicologia clinica. Milano, Franco Angeli editore. Berselli E., Menozzi F. (2018). La raccolta dei dati bio-psico-sociali – 100 domande. Hogrefe Editore.

Slides and additional material and information will be offered via elearning page.
