UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Neuropsichiatria Infantile

2425-1-F5107P012

Learning area

Models and Techniques for assessing psychological functioning

Learning objectives

Knowledge and understanding

· Broad issues in child and adolescent neuropsychiatry.

· Knowledge of diangostic principles and intervention within a multidisciplinary approach

Applying knowledge and understanding

. Acquisition of the general principles of child and adolescent neuropsychiatric assessment and reasoning

Contents

The course introduces the students to the study of (I) diagnoses and differential diagnostic aspects of the main childhood neuropsychiatric disorders (DSM-5) (II) notes on psychopharmacology in childhood and adolescence (III) notes on treatment criteria

Detailed program

· Autism spectrum disorders (clinical cases and treatment)
· Obsessive compulsive disorders (clinical cases and treatment)
· Anxiety disorders
· Mood disorders
· Early onset psychoses
· ADHD, conduct and behavior disorders (clinical cases, treatment)
· Notes on psychopharmacology in childhood and adolescence
· Innovative models of intervention in Neuropsychiatry and outcome evaluation
· Child neuropsychiatry services, organizational and treatment models and the role of the clinical psychologist

Prerequisites

General knowledge of DSM-5 diagnostic criteria and essential elements of general psychopathology

Teaching methods

Lecture-based teaching: 50 hours, Interactive: 6 hours. All lessons will be held in presence. Videos will be used. No lesson will be held remotely.

Assessment methods

Multiple choice test (true/false) and mandatory oral exam
The multiple choice questions aim to extensively test the student's preparation, with particular attention to the topics covered in class and the material available on the slides uploaded after each lesson.
The oral exam consists of an interview to discuss the written test and in-depth analysis with questions on the topics on the programme.
The evaluation criteria are: accuracy of the answers for the closed questions, adequacy of the contents, logical and formal organization and terminology for the answers to the open questions.
Erasmus students can contact the teacher to agree on the possibility of studying from a bibliography in English and/or the possibility of taking the exam in English
