COURSE SYLLABUS

Applied Social Cognition To Public Policies

2425-2-F5105P027

Learning area

APPLIED EXPERIMENTAL PSYCHOLOGICAL SCIENCES

Learning objectives

Knowledge and understanding

- Individual, social and societal factors affecting cognitions and behaviors
- Major socio-cognitive theories explaining the behavior
- Attitudes and beliefs systems affecting behavior
- Multiple intervention techniques and research methods

Applying knowledge and understanding

- Understanding, analysis, and evaluation of research designs to solve societal issues
- Analysis of diverse applied contexts of relevant social interest, e.g.: political, health, environmental, and technologies use domains
- Practical applications of diverse methods and research paradigms
- Critical analysis of applied research examples

Contents

The course will provide an overview of domains in which socio-cognitive theories and research have been applied outside the laboratory to influence public policies. The course will be devoted to examining a sample of behavioral

domains and contexts in which applied research has made contributions. These include political issues (e.g., promoting participation, reducing inequalities and improving intergroup relations), psychological and physical health (e.g., promotion and prevention behaviors, vaccination behavior), environmental concerns (e.g., climate change), mass media effects (e.g., scientific misinformation and conspiracy theories). Practical problems and ethical issues unique to the applied research will be considered.

Detailed program

- Features of applied social psychology
- Understanding social issues through applied social cognition
- Beliefs' system and attitudes
- Focus on models of attitude and behavior prediction
- Interventions and public policies
- Behavioral intervention strategies
- Interventions based on social influence
- Implementation and analysis of researches applied to the different behavioral domains: politics, health, environment, social media, and other new technologies.
- Thematic sessions: conspiracy theories; scientific misinformation; vaccination behavior; climate change; food psychology

Prerequisites

No previous knowledge is required. Good knowledge of the basis of Social Psychology enables a more informed fruition of the course contents. Students without such background knowledge are encouraged to request a list of basic references.

Teaching methods

The course will be held in presence. Teaching will consist of lecture-based lessons, and also interactive classwork with discussion of scientific articles, videos' presentations and comments, practical exercises, and discussions on the course topics. The course material (slides and, when possible, scientific articles) will be made available on the e-learning site of the course so that also non-attending students can use it.

Students will be given the opportunity to deepen a topic of the course through an assignment (i.e., project development, writing of an informative article) analyzing applied research of public interest.

Assessment methods

The exam is written (computer exam in the lab via the Moodle EsamiOnline Bicocca) with open-ended questions (equivalent to concise essays). The questions aim to ascertain the effective acquisition of socio-cognitive theories and methods to solve societal issues.

The evaluation criteria are: the correctness of the answers, the ability to argue, synthesize, create links, and

critically read the reality. Special attention will also be devoted to the acquisition of methods and measurement tools in applied social cognition field and the ability to analyze a scientific paper in the field.

Participation in optional activities (see didactic methods) contributes to the final evaluation.

Textbooks and Reading Materials

Maio, G. R., Haddock, G., &; Verplanken, B. (2018). The psychology of attitudes and attitude change. Sage Publications Limited. (only chapters indicated on the e-learning page).

Further compulsory material (research articles) will be made available by the professor during the course on the e-learning website.

Detailed information about didactic material will be published on the e-learning page of the course.

Sustainable Development Goals

GOOD HEALTH AND WELL-BEING | GENDER EQUALITY | REDUCED INEQUALITIES | SUSTAINABLE CITIES AND COMMUNITIES | RESPONSIBLE CONSUMPTION AND PRODUCTION | CLIMATE ACTION | PEACE, JUSTICE AND STRONG INSTITUTIONS
