Course title

SOCIOLOGY OF BUSINESS INNOVATION

Topics and course structure

Within the complex economic dynamics that characterize contemporary society, scientific and technological knowledge is one of the key factors of competitiveness. In order to fully exploit the possibilities for development, it is necessary that this knowledge does not remain confined to laboratories and research centers, but spreads in the economic and social context, gaining strength and generating innovation. A key factor in the mechanisms of knowledge transfer is represented by human capital, that is, by the presence of professional figures able to operate in the boundary areas between science, economy, and society, addressing the management problems related to the generation, selection, development, and implementation of innovation in organizations.

The course aims to present the most relevant models of innovation and discuss the systemic approach to innovation, with the goal of contributing to the development of specific skills with respect to theoretical models, tools and methods for the management of organizational change, one of the fundamental aspects of the Master's Degree in Training and Development of Human Resources.

Objectives

Through this teaching and constant, participative attendance of classes, the following learning is to be promoted:

Knowledge and understanding: to foster knowledge and understanding of innovation processes in general terms, in its different declinations and in relation to the macro-contexts of interest

Ability to relate differentiated knowledge and models: provide the information and tools needed to develop the

ability to understand and analyse these processes, stimulating the development of autonomous strategies for reading phenomena;

Ability to apply knowledge and models: make students autonomous in evaluating technological, market, management and organisational innovation processes in companies, start-up and business development projects, interpreting the choices made by the players operating in an area and the impact of their actions on the environmental context

At the end of the course, students will have acquired the following specific skills:

- ability to analyze the innovation process in the fields of technology, management, and business organization;
- ability to critically assess start-up and business development projects;
- ability to read and understand the choices of the relevant actors of a territory and their impact on the context of belonging.

Methodologies

The teaching methodology used combines different tools:

- frontal lessons, which aim to provide general information and skills that constitute the common knowledge of the class. The lectures will set up the theoretical framework necessary to provide students with the specific tools to develop the required analysis and comprehension skills. These teaching lessons will constitute approximately 70% of the total hours;
- group work, with the aim of developing the analysis, judgment and communication skills required for the evaluation of the proposed topics. A series of case studies will be proposed to be analyzed and declined according to the themes exposed related to innovation. These interactive lessons will constitute approximately 30% of the total hours.

Online and offline teaching materials

The books and articles are all available in digital format at the University Library.

Programme and references

Also in the Academic Year 2023/24, there will be no distinction between attending and non-attending students.

Required text:

Mura G., Aleotti F., Diamantini D., 2022, Il manuale della sostenibilità per le imprese, Mondadori Università.

Students must then select 4 texts of their choice from the following:

1. Porter M.E., (1998), "Clusters and the new economics of competition", Harvard Business Review, p. 77-89, Nov-Dec.
2. Monaci, M. (2012). L'innovazione sostenibile d'impresa come integrazione di responsabilità e opportunità sociali, Studi organizzativi, 2, 26-61.

3. De Marchi, V., Di Maria, E., & Spraul, K. (2018). Collaborazioni università-impresa: i risultati sul fronte dell'eco-innovazione. *ECONOMIA E SOCIETÀ REGIONALE*, 62-72.
4. Narula, S., Puppala, H., Kumar, A., Frederico, G. F., Dwivedy, M., Prakash, S., & Talwar, V. (2021). Applicability of industry 4.0 technologies in the adoption of global reporting initiative standards for achieving sustainability. *Journal of Cleaner Production*, 305, 127-141.
5. Reis, J. S. D. M., Espuny, M., Nunhes, T. V., Sampaio, N. A. D. S., Isaksson, R., Campos, F. C. D., & Oliveira, O. J. D. (2021). Striding towards Sustainability: A Framework to Overcome Challenges and Explore Opportunities through Industry 4.0. *Sustainability*, 13(9), 5232.
6. Easter, S., Ceulemans, K., & Lynn, M. L. (2021). Moving Beyond Sisyphus: Pursuing Sustainable Development in a Business-as-Usual World. *Business & Society*, 00076503211015914.
7. Agudelo, M. A. L., Jóhannsdóttir, L., & Davídsdóttir, B. (2019). A literature review of the history and evolution of corporate social responsibility. *International Journal of Corporate Social Responsibility*, 4(1), 1-23.

Assessment methods

there are no different exams for attending and non-frequenting students.
No in itinere tests will be carried out.

Type of test:The exam consists of a written test in which the student will be asked to demonstrate the acquisition of the knowledge discussed during the course and present in the bibliography, through open questions.

Evaluation criteria:The evaluation of the result of the paper is based on the mastery of the concepts and issues related to innovation addressed during the course and the ability to discuss cases and problems present in the bibliography. In addition to mastering the ability to argue the different paradigms, research perspectives, and operational tools, appropriate use of sociological vocabulary, clarity of exposition, and the ability to analyze and critically evaluate will be part of the assessment.

Office hours

The office is held by appointment.

Contact the professor by email: davide.diamantini@unimib.it

Programme validity

The programs are valid for two academic years.
