

UNIVERSITÀ
DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Medicina Propedeutica

2425-3-H4601D013

Aims

The course aims to provide students with a thorough understanding of the main medical, cardiological, and hematological pathologies relevant to the dental field. Students will learn to identify these pathologies, understand the principles of prevention and treatment, and consider gender differences in presentations and responses to treatments.

Contents

see the contents of the three different modules (internal medicine, cardiology, and hematology)

Detailed program

See the programs of the different modules

Prerequisites

Basic knowledge of the pathophysiology of medical-surgical diseases and the principles of pharmacology

Teaching form

Traditional lectures for the majority of the teaching hours combined with interactive teaching through the discussion of clinical cases (see individual modules)

Textbook and teaching resource

Medical textbooks, slides, and reference articles (upon request) provided by the instructors to the students

Semester

Third year - second half

Assessment method

Written exam with 75 multiple-choice (closed and open-ended) questions and optional oral component (upon request by the student or the teacher)

The reference language will be Italian

Office hours

By appointment with email to the teachers (giuseppe.bellelli@unimib.it; grzegorz-bilo1@unimib.it; rocco.piazza@unimib.it)

Sustainable Development Goals

GOOD HEALTH AND WELL-BEING | QUALITY EDUCATION | GENDER EQUALITY
