COURSE SYLLABUS

Anatomy of The Digestive System

2425-5-H4102D043-H4102D142M

Aims

Aims
To provide a correlation between genera normal anatomy and more frequent lesions adn diseases of digestive system.

Contents

Correlate anatomy and pathology of different digestive system diseases
Understand clinical-pathological correlations
Critical evalution the evolution of various non neoplastic pathologies

Detailed program

Non neoplastic eosophageal and gastric diseases
Celiac disease
Idiopathic bowel inflammatory disease
Non neoplastic pathology of the liver

Prerequisites

Anatomy and histology

Physiology
General pathology

Teaching form

In person oral lessons

Textbook and teaching resource

https://www.pathologyoutlines.com/

Semester

II semester, 5th year

Assessment method

Multiple choice questionnaire on discussed topics integrated in vertical tract exam

Office hours

By appointment (mail)

Sustainable Development Goals

QUALITY EDUCATION
