COURSE SYLLABUS

Semeiotics By Clinical Simulation

2425-2-H4101D011

Aims

The Semeiotic Course on Simulator carried out with practical exercises with dummies-simulators is aimed at the first learning of the techniques of approach to the patient and the main semeiological maneuvers to be applied in the objective examination, in preparation for the future professional activity carried out in the following years directly on the patient. The tutoring activity involves small groups of students, with the constant presence of the teacher in order to provide the basis for the first approach to theoretical knowledge and to the practical learning of multiple medical, surgical and emergency semeiological maneuvers.

Contents

The tutorial activity involves small groups of students, with the constant presence of the teacher in order to provide the basis for the first approach to theoretical knowledge and practical learning of the multiple semeiological medical, surgical and emergency maneuvers.

Detailed program

The course includes 3 different modules: the MEDICAL SEMEIOTICS module, the SURGICAL SEMEIOTICS module and the EMERGENCY TECHNIQUES module. For extended programs see the individual modules

Prerequisites

Knowledge of human anatomy and human physiology

Teaching form

Lectures held in plenary mode

Practical exercises on simulator dummies carried out in small groups. Each group exercise lasts 2 hours

Textbook and teaching resource

see the different teaching units

Semester

2nd semester

Assessment method

15 quizzes (5 for the medical part, 5 for the surgical part and 5 for emergencies) with a single correct answer chosen from 4 + two open questions

Office hours

On appointment by sending e-mail at raffaella.delloro@unimib.it fosca.quarti@unimib.it
