## SYLLABUS DEL CORSO

### Storia della Medicina e della Sanità

2425-2-H4101D254-H4101D171M

---

#### Aims

The aim of the module History of Medicine is to provide students with the tools for understanding the cultural and social aspects of modern medicine, through the analysis of its historical and epistemological evolution. The knowledge provided is the basis for knowing how to properly place the activity of the physician in the current socio-cultural context.

#### Contents

Introduction to the History of Medicine. Medicine in the ancient world (Pre-Hippocratic Medicine and Greek-Roman Medicine), Medieval Medicine, the Medical Renaissance, Baroque Medicine, Medicine in the Enlightenment, Medicine in the 19th century and Medicine in the 20th century.

## **Prerequisites**

see the general Syllabus of the Course

## **Teaching form**

Lectures. During the lessons, the teacher promotes discussion among students on problems related to modern medicine, involving students and asking them to report personal experiences and to reflect on the evolution of the concept of health and of the relationship between doctor and physician.

All classes are conducted in-person in a lecture format: 12 lectures of 2 hours each, held in-person.

The language is Italian.

## **Textbook and teaching resource**

Cesana G, Riva MA. Medicina e Società. Firenze: Società Editrice Fiorentina, 2017

## **Semester**

semester 1, year 2

## **Assessment method**

Final exam: written test with 18 closed multiple-choice questions with only one correct answer and 2 short-answer questions, in order to assess the basic knowledge and understanding of a topic and to evaluate the cognitive and interpretative skills.

Each multiple-choice question is worth 0.5 points, and each open question is worth 2 points.

## **Office hours**

By appointment, writing to [michele.riva@unimib.it](mailto:michele.riva@unimib.it)

## **Sustainable Development Goals**

GOOD HEALTH AND WELL-BEING | QUALITY EDUCATION
