COURSE SYLLABUS

The Management of Worker With Health Problems

2425-5-H4101D395

Aims

The purpose of the course is to deeply explore the process of evaluating the fitness-for-work of workers with health issues.

Contents

Workers with significant health issues require careful evaluation by the occupational physician. The course includes an in-depth exploration of aspects related to medical surveillance and fitness-for-work assessments for these workers. The course includes the presentation and discussion of clinical cases.

Detailed program

- Relevant legislation
- Medical surveillance and worker protection
- Evaluation of fitness for work in specific pathological conditions
- Presentation of clinical cases

Prerequisites

Enrollment in the fifth year of the degree course in Medicine and Surgery

Teaching form

The lectures (7 hours) are conducted in a lecture format at the beginning, aimed at engaging students interactively in the subsequent part.

All activities are conducted in person.

The language is Italian.
