DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Criminologia

2425-3-E1401A040

Learning objectives

A) Knowledge and understanding
Knowing and understanding, from a historical perspective, the psycho-socio-criminological approaches to criminal phenomena, particularly those involving violence. Critical analysis of national and international literature.

B) Applying knowledge and understanding
Ability to read and interpret the relationship between crime, the individual and society in its many forms through case studies.

C) Making judgements
Developing autonomy of judgment regarding the application of socio-criminological paradigms to practical cases and the possible preventive actions.

D) Communication skills
Ability to engage in interdisciplinary dialogue and communicate extra-legal knowledge.

E) Learning skills
Ability to understand the complexity of criminal phenomena from evolving psycho-socio-criminological perspectives.

Contents

The object of criminology is the study of the delinquency, with special reference to phenomenology and typologies of crime, theories about deviance, systems of social control and rehabilitative measures.

The aim is to outline problems regarding methods and object of the criminology and study in detail, theoretically and empirically, the multidisciplinary approach to crimes and their authors.

Detailed program

Field and object of criminology. Criminology and forensic sciences. Criminology, law and culture. Historical developments of the criminology. Typologies of crime. Sociological theories about criminality. Psychological theories about criminality. Biological theories about criminality. Mental disease, capability and law. Drugs and crime. Policies and crime. Clinical criminology

Prerequisites

No specific prerequisite required

Teaching methods

Lecturers and trainings in class
The lessons will be heald with a frontal mode in the first part of the course (DE 10 hours), and in an interactive way for the second part of the course (DI 32 hours)

Assessment methods

Prova orale: la prova orale consiste in un colloquio svolto sui testi d'esame e sugli argomenti svolti a lezione. Durante la prova orale, è inoltre possibile discutere un elaborato concordato precedentemente con il docente e sviluppato a partire dai contenuti teorici indicati nella bibliografia. L'obiettivo è verificare la capacità di comprendere ed esporre in modo chiaro e personale gli argomenti fondamentali della materia. I criteri di valutazione delle competenze indicate si basano sulla conoscenza e comprensione dei contenuti fondamentali della disciplina e sulla capacità di applicare le conoscenze acquisite con una rielaborazione personale.
