COURSE SYLLABUS

Quality of Urban Life

2425-2-F8802N069

Learning objectives

Achieve the necessary skills to define, measure and evaluate the quality of urban life and the most appropriate policies to increase it, both individually, collectively or for specific population groups. Develop abilities for collaboration with other professionals in planning activities.

Contents

The course will be articulated in different parts concerning the history of the research on quality of life, the definition of the concept of quality of life and the methodology for studying quality of life, with further details on the quality of life for metropolitan populations: residents and non-residents and on urban policies. A specific and introductive part of the course will concern the role of sociology in planning for improving urban quality of life.

Detailed program

COURSE INTRODUCTION

Part one

- Definition of territorial systems
- Cities and urban populations

Part two

- Sociology and urban planning
