COURSE SYLLABUS

Open Science

2425-77R-2

Titolo

OPEN SCIENCE

Docente(i)

Carlo Reverberi/Cristina Zogmaister

Lingua

English

Breve descrizione

The course is divided into two parts that examine some of the main aspects of open science, with a particular focus on psychology and cognitive sciences. The first part focuses on aspects of Open Science related to the transparency of its processes, such as pre-registration, publication, and material sharing. The second part focuses on data sharing, the use of public data, the impact of research results, and more generally, its influence on scientific research and the community.
