SYLLABUS DEL CORSO

Pathways, biomarkers and new therapies in neurodegenerative disorders

2425-122R-04

Titolo

Pathways, biomarkers and new therapies in neurodegenerative disorders

Docente(i)

Carlo Ferrarese

Lingua

italiano o inglese

Breve descrizione

To present current translational research on pathways and biomarkers for early diagnosis and new targeted therapies , the course will focus on:

molecular mechanisms of neuronal damage (protein misfolding, excitotoxicity, oxidative stress, neuroinflammation)

biomarkers in patients

new therapeutic trials based on biomarkers

CFU / Ore

1/8

Periodo di erogazione

Secondo semestre
