SYLLABUS DEL CORSO

Qualitative Social Research Methods

2425-118R-QualSRM

Obiettivi formativi

The course provides an overview of the methods of qualitative data collection and analysis most commonly used in social science research. Upon course completion, students should be able to collect and analyze most qualitative data of interest.

Contenuti sintetici

The first part of the course focuses on the most popular qualitative techniques for gathering data: interview and focus groups (12 hours). Then, the course explains the ethnographic approach (8 hours). In the following lessons, content analysis is discussed both illustrating traditional approaches (4 hours) and using packages for computer-assisted qualitative research (NVivo, ATLAS.ti, and MAXQDA) (8 hours).

Programma esteso

The first part of the course focuses on the most popular qualitative techniques for gathering data: interview and focus groups (12 hours). Then, the course explains the ethnographic approach (8 hours). In the following lessons, content analysis is discussed both illustrating traditional approaches (4 hours) and using packages for computer-assisted qualitative research (NVivo, ATLAS.ti, and MAXQDA) (8 hours). The course concludes with a students' inclass presentation, in which they will discuss a comprehensive report of the research activities carried out during the course according to instructors' assignments.

Prerequisiti	
none	
Metodi didattici	

Lectures and group work in the classroom

Modalità di verifica dell'apprendimento

Evaluation of final assignment

Testi di riferimento
