## SYLLABUS DEL CORSO

### Financial Markets

2526-1-F5603M002

---

#### Learning objectives

##### **Knowledge and Understanding**

By the end of the course, students will have acquired a systematic understanding of the functioning of financial markets and of both traditional and innovative financial instruments. They will comprehend the organizational and operational structures of markets, as well as the main mechanisms for valuing financial instruments. Furthermore, they will be able to interpret economic and financial dynamics in global contexts.

##### **Applying Knowledge and Understanding**

Students will be able to critically apply the theoretical knowledge acquired to the analysis of real-world cases, with a particular focus on the technical evaluation of financial instruments and the analysis of market operations. They will be capable of using analytical models and tools to interpret and solve complex problems in the financial domain.

##### **Transversal Skills**

Students will develop independent judgment in analyzing economic and financial phenomena, continuous learning abilities, and communication skills to clearly and effectively present the results of their analyses. They will also be able to work collaboratively and operate in professional environments characterized by international and multidisciplinary dynamics.

#### Contents

The course analyses the following contents:

- 1) The structure and functioning of the financial system
- 2) The role of financial markets and financial institutions
- 3) The money markets, the bond markets and the stock markets

4) The financial instruments negotiated in the organised securities exchanges

## **Detailed program**

### *The financial instruments negotiated in the organised securities exchanges*

- Types of bonds
- Finding the value of bonds
- Rating
- Stocks, equity securities, and hybrid instruments
- Finding the value of stocks
- Financial Derivatives
- Mutual funds
- The initial public offering (introduction)

## **Prerequisites**

Basic background of financial mathematics, business economics and business accounting

## **Teaching methods**

The course consists of 49 hours (7 CFU) of these:

21 hours of face-to-face lectures

28 hours of e-learning activities (video lessons, case studies, multiple choice questions or open question, group work)

All students are offered the opportunity to carry out a group project (outside regular class hours, as part of the online activities) during the teaching period. Working in groups of 4 to 5 members, students are required to analyze a topic assigned by the instructor, prepare a written report, and participate in a classroom debate. This activity contributes to the development of problem-solving skills and enhances communication abilities in the financial field.

## Assessment methods

The final evaluation is done with a written examination (with optional oral at the request of the teacher or student) composed by three parts:

1) 10 multiple choice questions (3 points for each correct answer, maximum grade 30/30): for the extensive monitoring of the preparation of the examination programme

2) 1 open question (maximum grade 30/30): for intensive monitoring of autonomous thinking on critical points of the programme

3) 1 open question or an exercise (maximum grade 30/30): as control of disciplinary problem solving skills

The final grade is given by the simple average of the grade of all the three exam parts.

For all students who did the group work, the final examination mark will be calculated as: 40%\* group work mark + 60% written examination mark

*Intermediate tests are not foreseen*

## Textbooks and Reading Materials

Mishkin F.S., Eakins S., Financial Markets and Institutions, Pearson 2018 (the ebook is available at the Bicocca Library website) ninth edition Chapters: 1, 2, 3, 7, 11, 12, 13, 20, 22, 24
