Assessment methods

The examination consists of one-hour a written test

The written test consists of 3 questions; each answer is marked from 0 to 10. Overall, the test will be marked at a maximum of 30/30.

The written test is passed if a minimum mark of 18/30 is achieved.

The choice of written test is consistent with the teaching objectives in that it allows the student to propose critical reflections and a personal reworking of the proposed content, in particular on the historical evolution of educational contexts and pedagogical models.

There is the possibility of an intermediate written test with valid assessment for the examination: the modalities will be explained during the course

According to Article 27 of the University Student Regulations, it is still the right of the student and the teacher to request an oral test after the written paper should they wish or deem it appropriate.

In the latter case, the oral examination only takes place at the request of the student or at the request of the teacher after passing the written examination.

The oral examination consists of an interview on all the examination texts, with a separate grade expressed in thirtieths. The final mark is the average of the written and oral marks for those who request the oral examination; only the written mark for those who do not request the oral examination. If, at the end of the oral examination, the student refuses the mark, he/she will have to repeat the entire examination (written + oral) at a later call.

Students with a DSA certification must send an e-mail with the P.U.O.I. attached ten days before the day of the roll call so that compensatory measures can be agreed in good time.

Students with a DSA certification must send an e-mail with the P.U.O.I. attached to the lecturer Dr. Luca Comerio (luca.comerio@unimib.it) ten days before the day of the roll call so that compensatory measures can be agreed in good time.

The assessment of the tests will follow the following criteria:

- relevance of exposed content
- richness/articulation of the content presented
- capacity for personal and critical reworking of content
- internal coherence of concepts and arguments
- correctness of the concepts illustrated and discussed
- explicit references to the texts studied
- correctness of terminology and syntax

On the basis of the above criteria, the assessment will be broken down into thirtieths:

Sufficient relevance of the contents and limited articulation of the same; preparation with a low level of personal and critical reworking of the contents; limited internal coherence of concepts and arguments; sufficient correctness of the contents expressed and limited explicit references to the texts; good terminological, orthographic and syntactic correctness: 18-20/ 30

Good relevance of content and sufficient articulation of content; preparation with sufficient level of personal and critical reworking of content; good internal coherence of concepts and arguments; good correctness of expressed content and sufficient explicit references to texts; good terminological, spelling and syntactic correctness: 21-24/ 30

Good relevance of content and good articulation of content; preparation with a good level of personal and critical reworking of content; good internal coherence of concepts and arguments; excellent correctness of expressed content and significant explicit references to texts; excellent terminological, spelling and syntactic correctness 24-27/ 30

Perfect relevance of content and broad articulation of content; preparation with an excellent level of personal and critical reworking of content; good or very good internal coherence of concepts and arguments; excellent correctness of expressed and significant content and various explicit references to texts; excellent correctness of terminology, spelling and syntax 28-30/ 30
