## COURSE SYLLABUS

### Social-Developmental Psychology

2526-1-F5113P010-F5113P01001

---

#### Learning area

Typical development and educational contexts

#### Learning objectives

##### *Knowledge and understanding*

- Possess critical knowledge and demonstrate the ability to understand the theoretical foundations and empirical bases relating to the processes and mechanisms of cognitive, linguistic, affective and social development in developmental age, from early childhood to adolescence
- Possess critical knowledge and demonstrate the ability to understand the relationships between the different developmental contexts, in particular between school, family and social support networks
- Possess critical knowledge and demonstrate the ability to understand the risk factors that may arise during development
- The psychological processes underlying stereotypes and prejudice in children
- The impact of stereotypes and prejudice on the target

##### *Applying knowledge and understanding*

- Possess the ability to apply knowledge and understanding in order to monitor developmental processes and identify any areas of difficulty and/or possible risk factors, also in reference to the peculiarities of the different developmental contexts
- Ability to understand the intergroup dynamics in educational settings
- Application of acquired knowledge in a perspective of prevention and intervention

##### *Autonomy of judgment*

- Acquisition of the ability to make autonomous and critical judgments in the evaluation of individual and group situations and those relating to intervention plans, also taking into account the principles of professional ethics formulated by the Order of Psychologists

### *Communication skills*

- Acquisition of communication skills that allow you to interact effectively with people, groups and institutions directly and indirectly involved in your interventions in the professional field, in order to facilitate teamwork, to intervene effectively within the network of services and to clearly communicate your specific psychological contribution
- Learning skills\*
- Promote the acquisition of the ability to update your knowledge, learning autonomously and critically the new acquisitions of national and international scientific research of the reference disciplines, regarding content, planning and interventions, as well as the ability to learn from the experience of operators, teachers and specialists in the sector or other disciplines
- Promote the ability of analysis, investigation and critical reflection necessary to undertake higher education courses

## **Contents**

In the first part of the course, students will be presented with the psychological processes underlying stereotypes, prejudice and discrimination in children, the impact of such phenomenon on children and their academic performance, and the strategies to reduce prejudice.

## **Detailed program**

- The cognitive and social roots of children's prejudice: family, school and peers; social categories' formation and awareness (age, gender, ethnicity);
- Social identification and ingroup preference: ethnocentrism, and the effects of prejudice and discrimination on minority's children;
- The impact of the stereotype threat and self-fulfilling prophecy on children's academic performances;
- Strategies to reduce prejudice: the contact hypothesis;

## **Prerequisites**

Good knowledge of the basis of Psychology (in particular of Social Psychology) enables a more aware use of the course contents. Students lacking such basic knowledge are encouraged to ask for a list of basic references.

## **Teaching methods**

The course consists entirely of lectures.

All lessons will be held in person and in Italian. They will include mixed activities of delivered and interactive teaching. Approximately 20 hours will be organized as frontal lectures (Delivered Didactic), and 8 hours as guided discussions of scientific articles, cases, films and carrying out exercises on the topics of the course (Interactive Didactic).

The material (slides and, when possible, scientific articles) is made available on the e-learning site of the course, so that it can also be used by non-attending students.

## **Assessment methods**

The exam is written with open questions. The questions are aimed at ascertaining the effective acquisition of both theoretical knowledge and the ability to apply them to the reality.

For those students who request it, an oral interview is also provided, on all the topics of the course, which can lead to an increase or decrease of up to 2 points compared to the score of the written exam.

The evaluation criteria are: the correctness of the answers, the ability to argue, synthesize, create links, and apply the course contents to the reality.

*Although this course is held in Italian, for Erasmus students, course material can also be available in English, and students can take the exam in English if they wish to do so*

## **Textbooks and Reading Materials**

Detailed information about the teaching material will be published on the e-learning page associated with the course.

## **Sustainable Development Goals**

GOOD HEALTH AND WELL-BEING | GENDER EQUALITY | REDUCED INEQUALITIES | PEACE, JUSTICE AND STRONG INSTITUTIONS
