COURSE SYLLABUS

Strategic Analysis

2526-1-F7704M018-F7704M018-1

Learning objectives

During the course, students will learn the core concepts and analytical tools needed to elaborate and execute firm strategies in global markets.

The skills acquired in this course can be applied to the strategic management of startups and established companies in the manufacturing and service sectors.

To stimulate critical and analytical skills, various activities are planned, such as preparation and class discussions of case studies and the organization of lectures with the participation of entrepreneurs and managers.

Teamwork, presentation of case studies and meetings with actors from the industrial world will also help to develop students' communication skills. The approach to study adopted in this course, based on analytical rigor and student engagement in scientific debate, will foster the development of critical thinking, which is crucial for their future studies and professional careers. Developing a scientific mindset will help students question existing assumptions and formulate new ones based on rigorous theorizing and empirical evidence.

Contents

This module offers an overview of firm market strategies, by providing students with advanced analytical tools needed to understand competitive strategies and corporate strategies in global markets. The topics dealt with are at the core of the modern firm strategy. Moreover, students will be involved in the analysis and discussion of case studies and the preparation of team works on real firms.
