## COURSE SYLLABUS

### Strategic Management

2526-1-F7704M002

---

#### Learning area

#### Learning objectives

The course of Strategic Management introduces students to the analytical tools required to understand firm behaviour and strategic interaction in different markets. The course studies competitive strategies and entrepreneurship with a particular attention to global market and is structured in two modules :

- 1) Competitive Strategy
- 2) Innovation Management and Entrepreneurship

#### Competitive Strategy

At the end of the first module students will acquire the core concepts and analytical tools needed to understand the competitive environment and to thrive in global markets.

#### Innovation Management and Entrepreneurship

At the end of the second module, students will acquire core concepts and analytical tools required to understand how to manage technical and market change in established firms and new enterprises.

The skills acquired in both modules of this course can be applied to the management of startups, SMEs and large companies in the manufacturing and service sectors. In order to stimulate critical and analytical skills, various activities are planned, such as classroom discussions of case studies and the organization of lectures with the participation of entrepreneurs and managers. Active participation in the discussion of case studies and meetings with actors from the industrial world will also help to develop students' communication skills. The approach to study adopted in this course, based on analytical rigor and student engagement in scientific debate, will foster the development of critical and scientific thinking, which is crucial for their future studies.

## **Contents**

The program of the first module offers an overview of firm market strategies, by providing students with the analytical tools needed to understand competitive strategies, corporate strategy and international business strategies.

The program of the second module focuses on the creation and maintenance of competitive advantage in conditions of rapid technical and market change. This topic is treated by analyzing: (a) the innovation strategies and business models of market leaders and followers; (b) the business plan of new enterprises.
