SYLLABUS DEL CORSO

Media and Digital Culture

2526-1-F8804N011

Learning objectives

Knowledge and understanding:

The course aims to provide an overview of contemporary media dynamics, particularly emphasizing the influence they have on culture. By studying the functioning of new media, the course will allow students to deepen their understanding of the technological, social and cultural underpinnings of the contemporary media ecosystem, and will provide them with tools that will be useful during their work life.

Applied knowledge and understanding:

the application of acquired skills and sociological categories to the analysis and conscious observation of social reality mediated by ICT

Independent judgment:

- development of critical reflections on the process of digitalization

Communication skills:

- familiarization with digital media-sociological vocabulary

Learning ability:

- ability to combine theoretical awareness with empirical social reality.

Contents

In the first part we will analyze the changes in the media industry in the new century, trying to highlight the technological and digital transformations that have profoundly changed this sector. In the second part we will focus on analyzing the birth and structure of the creative industry on social media.
