SYLLABUS DEL CORSO

Sustainable Development and Public Law

2526-1-E3304M006

Learning objectives

1. Knowledge and understanding
Provide basic knowledge of Environmental Law.
2. Applying knowledge and understanding
Develop juridical approaches and methodologies for the analysis of environmental issues, even through cases.
3. Autonomy of judgment
Learn to critically evaluate the legal effects of environmental policies and decisions, even in contentious contexts or in the presence of conflicting interests (environment vs. economic development).
4. Communication skills
Report clearly on environmental legal issues.
5. Learning skills
Develop the skills necessary to continue independently to keep abreast of environmental law and to be prepared for research, specialization or professional career paths in legal fields related to sustainability and environmental protection.

Contents

The course is concerned with the study of the principle of sustainable development and its application in the legal system, even focusing on the analysis of problems related to the implementation of decarbonization goals.

Detailed program

Sustainable development: from principle to economic model

Sustainable development and the circular economy, including the waste discipline
Sustainable development and decarbonization policies, including the discipline of renewable energy and climate litigation
Sustainable development and the marketplace, including the government's sustainable procurement plan
Sustainable development, DNHS and green claims.

Prerequisites

None

Teaching methods

Lectures will be held, as a rule, in presence, in delivery mode especially in the initial part, and then encourage critical learning, including in interactive mode, in the later part of the course.

Some lectures will be streamed or recorded, even considering strikes or possible overlaps with other conferences or events of interest.

The detailed schedule of lectures will be posted on the platform in the week prior to the start of the lectures.

Pwp presentations will be used in class along with other jurisprudential, doctrinal and regulatory materials.

All the materials will be uploaded on the platform.

Assessment methods

Oral test: interview on the topics covered in the program.

At the beginning of the course, it may be agreed that students will focus and present specific topics to the class.

Textbooks and Reading Materials

All the materials will be uploaded on the platform.

Semester

First semester

Teaching language

English

Sustainable Development Goals

NO POVERTY | GOOD HEALTH AND WELL-BEING | CLEAN WATER AND SANITATION | AFFORDABLE AND CLEAN ENERGY | DECENT WORK AND ECONOMIC GROWTH | INDUSTRY, INNOVATION AND INFRASTRUCTURE | REDUCED INEQUALITIES | SUSTAINABLE CITIES AND COMMUNITIES | RESPONSIBLE CONSUMPTION AND PRODUCTION | CLIMATE ACTION | PEACE, JUSTICE AND STRONG INSTITUTIONS
