COURSE SYLLABUS

Laboratorio: Deontologia e Responsabilità dello Psicologo in Ambito Sanitario - Turno A

2526-2-F5108P026-TA

Learning area

2. Methods and techniques for treatment and rehabilitation

Learning objectives

Knowledge and understanding
• Acquisition of the historical foundations concerning the establishment of the profession of psychologist in Italy and approval of the Code of Conduct of Italian psychologists;
• Knowledge of the principles that inspire the Code and its aims;
• Examination of the Code of Ethics articles;
• Basic legal and theoretical principles of deontology and civil and criminal legislation concerning the profession of psychologist.

Applying knowledge and understanding
• Applying knowledge of ethical principles to specific cases;
• Methods for the correct drafting of reports requested by customers, patients or client entities.

Independent judgment
The course fosters critical reflection on ethical dilemmas and the professional responsibilities of psychologists in healthcare settings, encouraging the ability to analyze complex situations with ethical and regulatory awareness.

Communication skills
Students develop communication skills for managing sensitive professional situations, with a focus on active listening, emotional regulation, and responsible communication in critical contexts.

Learning skills
The course promotes autonomous learning and ongoing professional development regarding regulations, the code of ethics, and relevant scientific literature, also through case analysis and the study of English-language materials.

Contents

Legal framework of the profession of psychologist with in-depth analysis of regulatory and ethical aspects. The themes of professional responsibility and its foreseeable consequences will be explored both in health care and in various organizational settings with reference to the therapeutic contract, the importance of informed consent and professional obligations. Both classroom lectures and guided practical activities with supervision will be provided.

Detailed program

Course topics:
• Ethics, deontology and the law
• Psychology as a profession: Being a psychologist and practicing as one
• Professional responsibility
• Therapeutic contract and settings
• Informed consent
• Professional secret
