Coral Health and Disease Assessment

2526-1-128R-MTM.02

Title

Studio e valutazione dello stato di salute dei coralli

Teacher(s)

Simone Montano

Language

english

Short description

The course consists of a 8 hrs training on Coral Reef Health and Disease Assessment. Attendees are trained for the identification of coral diseases affecting coral reefs, their epizootiology and the monitoring of damaged/threatened coral reefs through time. The course will also provide insight about how to monitor the health conditions of the coral reefs over time and potentially to study/investigate newly discovered diseases affecting reef-building corals as well as to apply mitigative techniques for the recovery of previously impacted coral reefs.

CFU / Hours

1CFU/8hrs

Teaching period

July 2024
