## **Pediatria**

2526-6-H4101D037

#### **Aims**

After the Professional Internship (Tirocinio Professionalizzante) focused on healthy children and their growth, which takes place in the 5th year according to the program contained in the related Syllabus and which will be a subject included in the final assessment of the entire Pediatric Course that in completed in the 6th year, aiming at enabling each student to acquire contents and skills to be able to deal with the most common and relevant pediatric issues, in terms of prevention, diagnostics and treatment, and to manage emergencies related with pediatric patients which might be encountered during the clinical practice of physicians, who are not necessarily become pediatricians. The course also integrates knowledges within the Child Neuropsychiatry field.

#### **Contents**

Global overview of the healthy child and in the presence of the major specific pathologies of childhood. Methods of managing the visit, such as:

carrying out a complete pediatric objective examination, detecting the most important normal and pathological growth parameters (auxological and neuropsychomotor development) and identifying the conditions that require prompt medical attention and/or intervention.

Impact of epidemiological, gender and multicultural aspects in the diagnostic and therapeutic path of diseases.

## **Detailed program**

Please refer to the specific modules GENERAL AND SPECIALIST PEDIATRICS and CHILD NEUROPSYCHIATRY

# **Prerequisites**

Knowledge related to physiology and basic science courses Participation in the 5th year internship activities

## **Teaching form**

- in-person teaching starting from clinical cases proposed by the teacher, divided by pathologies/nosological areas
- interactive teaching in person with exercises
- teaching under the supervision of the teacher, with proactive involvement of students divided into 3 groups in the differential analysis of clinical cases according to the PROBLEM BASED LEARNING method on program topics

#### Textbook and teaching resource

Nelson Essentials of Pediatrics – 9th edition (English version) Autore/i: Marcdante - Kliegman - Behrman – Nelson Editore: Elsevier – Saunders

#### Semester

first semester

#### Assessment method

The exam consists of a written test in attendance that includes:

- 20 multiple choice quiz, with 4 options, each of which can be true or false
- space for possible comments on each individual quiz
- 1 open question

related to Pediatrics topics, which includes the issues related to the healthy child, according to the program contained in the 5th year Pediatrics and Child Neuropsychiatry Syllabus, covered in class or present in the textbook (Nelson Essential of Pediatrics).

The overall quantitative and qualitative evaluation of the test includes:

- 0.375 points for each correct quiz option maximum 1.5 points for each quiz
- up to 1 point for comments, which allow the evaluation of the student's preparation to be broadened
- up to 2 points for the open question, whose answer must be pertinent and exhaustive in order to contribute to the final score
