COURSE SYLLABUS

Public Health

2526-4-H4102D090-H4102D117M

Course title

Public Health

Topics and course structure

Indications and contro-indications vaccination practice.
Consent form related to vaccines.
Health care requirements to driving licence and firearms licence.
Application of legal requirements for civil invalidity.
Assessment and ascertainment of death and current legislation.

Objectives

Orient the student regarding the profile of skills and operational duties of the Doctor working in the Social and Health District, and the district organization.

Methodologies

Supporting the District Doctor in daily operations.
Discussion of typical cases.
Targeted regulatory insights.

Online and offline teaching materials

Recognition of the specific regulatory context and approach to the salient regulations.

Programme and references

The all-round reconnaissance of district activities, alongside each medical director on duty, will be structured, for the student, according to the time frame of attendance at the District.
A summary work program will be given to the student at the beginning of attendance.

Assessment methods

The evaluation, aimed at the profitability of the experience for the student, will be carried out according to the following variables: punctuality, attention/curiosity, proactivity and willingness to discuss.

Office hours

Attendance will take place during the ordinary activity hours of the district service: working days from 08.30 to 17.00.

Programme validity

Intervening critical issues may lead to impromptu changes to the work program.

Course tutors and assistants

The support of a District medical director is persistent. Under no circumstances will the student be left to fend for themselves during their presence at the district facilities.

Sustainable Development Goals

GOOD HEALTH AND WELL-BEING | GENDER EQUALITY
