SYLLABUS DEL CORSO

Enhance Your Communication Skills

2526-3-H4102D115

Aims

Identify and reflect on their own communication style, including strengths and areas for improvement.

Demonstrate effective verbal and non-verbal communication skills.

Apply principles of plain language to ensure clarity and understanding during patient interactions (avoiding medical jargon).

Recognize and appropriately respond to patients' emotional cues and non-verbal signals, demonstrating empathy and respect.

Deliver difficult or emotionally charged information (e.g., breaking bad news) in a compassionate and structured manner using evidence-based protocols (e.g., SPIKES).

Contents

This unit will provide students with theoretical knowledge and practical strategies for effective and functional communication and a general overview of the most important psychological mechanisms involved in interpersonal relationships. In particular, the course will offer participants the knowledge and skills necessary to effectively communicate with patients. Students will be invited to reflect on their personal communication style and they will learn the importance of matching their communication style with situational goals and learn how to manage and control challenging conversations.

Detailed program

1. Introduction to Communication Skills
