DEGLI STUDI DI MILANO-BICOCCA

SYLLABUS DEL CORSO

Gravidanza - 5

2526-2-I0102D010-I0102D029M-T5

Aims

At the end of the course the student:

- understand the physiology of pregnancy
- understand the changes associated with normal pregnancy
- be able to plan evidence-based obstetric care for women with normal pregnancies

Contents

The course provides the students the essential elements to understand the physiology of the pregnancy and provides the elements to plan an evidence based midwifery care.

Detailed program

The students will be able to plan and to provide an evidence base midwifery care during pregnancy in accordance with the Midwifery Partnership Model, the Midwifery Management, the international Classification Functions and evaluation scales.

Prerequisites

Students will receive a detailed bibliography before lessons start. They will have to study the material in order to be

evaluated on the required basic skills.

Teaching form

Lectures, practice exercises and group work.
