SYLLABUS DEL CORSO

Ostetricia, Ginecologia e Neonatologia Clinica 1 - 5

2526-1-I0102D902-I0102D905M-T5

Aims

The course provides the essential elements to apply the Midwifery Management and describe the actions of obstetric, gynecological and neonatal care. It provides students with the scientific-methodological knowledge and technical-professional skills to be applied into care procedures, diagnosis and treatment as part of Obstetric Sciences - Gynecological and Neonatal. Provides the tools for critical ethical and bioethical analysis to be used when faced with ethical dilemmas and conflicts in Midwifery Care

Contents

The Midwifery Management procedures. Basic Midwifery care procedures for Mother and Newborn. Therapeutic Prescription and Therapeutic Administration. Hygiene notion and prevention of infections. The different approaches and models of bioethical reflection. The tools for resolving ethical dilemmas/conflicts. The Deontological Codes of Obstetrics/Organisation (FNOPO and ICM)

Detailed program

The detailed program can be found in the Syllabus of the individual modules that compose the course.

Prerequisites

None

Teaching form

Lectures conducted mainly in-presence with alternating lectures and interactive teaching.
Please refer to the Syllabi of the individual teaching modules for a detailed description of their teaching methods.

Textbook and teaching resource

The bibliography can be consulted in the Syllabus of the individual modules that compose the course.
The teaching materials (slides, work tracks, scientific articles, etc.) will be uploaded on the e-learning page dedicated to the individual modules.

Semester

II semester

Assessment method

The final exam is intended to assess the acquisition of knowledge and understanding of the program content, testing the ability to apply it with clinical reasoning and care planning.
It consists of a written test followed by an oral examination.
The written test consists of closed-ended questions (true/false, matching, multiple-choice quizzes) and short open-ended questions on the content covered in the following Didactic Units:

- Obstetrics, Gynecology and Clinical Neonatology 1 and 2
- Obstetrical Gynecologic and Neonatal Management.
  The oral examination involves the restitution of the written exam and an colloquium on the topics covered in class in all four Didactic Units that comprise the teaching.
  The use of correct terminology and appropriate disciplinary language will also be considered for evaluation.
  For further details, please refer to what is specified in the individual Unit Syllabi and the directions that will be given during lessons.

Office hours
