DEGLI STUDI DI MILANO-BICOCCA

## SYLLABUS DEL CORSO

### Tecniche Angiografiche

2526-2-I0303D008-I0303D039M

---

#### Aims

The student must demonstrate that they understand the technical basis of angiography and know the main clinical indications for angiographic examinations. He/she will need to possess solid knowledge of radiological anatomy and demonstrate mastery of body angiography procedures.

#### Contents

The module aims to provide the student with the theoretical, technical and practical knowledge for carrying out angiography exams in the study of different organs or systems and the main interventional radiology procedures.

#### Detailed program

##### GENERAL DEFINITIONS

Meaning of terms: what angiographic and interventional methods are and what they are used for.

##### HISTORY AND EVOLUTION

Notes on the history and evolution of the methods over the years.

##### EXECUTION OF PROCEDURES

The process from patient preparation to image archiving.

#### Prerequisites

## Teaching form

4 frontal lessons of 2 hours carried out in attendance

## Textbook and teaching resource

Teaching material provided by the teacher

## Semester

First semester

## Assessment method

### Monza

Oral interview to check preparation on the exam program and ability to properly use the technical language.

### Bergamo

Closed-answer tests (multiple choice questions) and written open questions to evaluate preparation on the exam program and expository ability in the disciplinary field. Possible additional oral interview if requested by the teacher or the student.

## Office hours

By appointment required by mail

## Sustainable Development Goals

GOOD HEALTH AND WELL-BEING | QUALITY EDUCATION
