### **COURSE SYLLABUS**

## Training in Mri Diagnostic Techniques in Neuroradiology

2526-2-I0303D009-I0303D058M

#### **Aims**

Nuclear Magnetic Resonance in Neuroradiology: the reception of the patient, the collection of his medical data and information for Nuclear Magnetic Resonance examination in Neuroradiology; absolute and relative contraindications for the Nuclear Magnetic Resonance examination; the correct positioning of the patient, the examination settings: coils, sequences, the execution of the examination; the processing and archiving of images.

#### **Contents**

By the end of the second year of training, the students will be able to conduct Nuclear Magnetic Resonance diagnostic investigations in Neuroradiology, knowing the functioning of equipments and the procedures for processing and archiving of produced images.

The students will also be able to respect and apply the standards of radioprotection for patients and workers.

**Detailed program** 

**Prerequisites** 

**Teaching form** 

Traineeship

### Textbook and teaching resource

#### Semester

Second semester

### **Assessment method**

Evaluation form completed by the tutor at the placement site to assess aspects such as interpersonal skills with the patient, technical management of the examination and use of equipment. Final oral examination conducted with the lecturers in charge of the practical traineeship in order to verify in a structured manner the achievement of the planned training objectives.

### Office hours

By appointment required by mail

### **Sustainable Development Goals**

GOOD HEALTH AND WELL-BEING | QUALITY EDUCATION
