

SYLLABUS DEL CORSO

Tecniche Analitiche

2526-1-I0302D005-I0302D020M

Aims

Students' skills: to illustrate the basic principles and applications of clinical biochemical techniques as photometric, electrophoretic, immunometric, CSF analysis, enzymatic assays.

Contents

To provide the fundamentals of the main principles of analytical and instrumental techniques employed in Clinical Biochemistry and Neurochemistry.

Detailed program

Laboratory instruments. Basic principles and applications of the main lab techniques: photometric, electrophoresis techniques, hemo-chromo-cytometric and CSF analysis. Evaluation of analytical methods (practicability, reliability, accuracy). Biomarkers: concept and uses in the diagnostic workout for Alzheimer's disease and Cerebral Amyloid Angiopathy.

Prerequisites

Biomedical Sciences

Teaching form

Lectures and seminars

Textbook and teaching resource

The teacher will provide educational material

Semester

2° semester

Assessment method

Oral test aimed at evaluating global comprehension of the course program.

Office hours

By appointment

Sustainable Development Goals

GOOD HEALTH AND WELL-BEING
