

## COURSE SYLLABUS

### **Software for experiments: Matlab**

2526-127R-4

---

#### **Titolo**

MATLAB

#### **Docente(i)**

To be defined

#### **Lingua**

English

#### **Breve descrizione**

The course aims to provide the fundamentals for programming in Matlab. Matlab is a versatile software used in various fields, including the programming of cognitive and psycho-physiological experiments. The software is one of the most widely used software in experimental research and cognitive neuroscience. In particular, it is well-suited for the integration in experimental contexts of physiological and behavioral data. There are Matlab tools for integrating and synchronizing data from different sources, such as physiological and behavioral data.

## **CFU / Ore**

2 CFU/24 hours

## **Periodo di erogazione**

See the calendar

## **Sustainable Development Goals**
