Methods of assessing the outcomes of the learning process

For those who wish to have the module recognised, by completing it together with the other three teaching units included in course X, a short written essay is required, which will be graded. The final assessment for the course will consist of the average of the grades for the four teaching units.

The test consists of a paper of at least 4 pages (2000 characters per page) and a maximum of 8 pages.

In the short written essay, each participant will identify a topic of interest to be explored critically, based on what has been discussed and with the support of material to be agreed with the lecturer (for example: a book, scientific articles or guidance documents) and will send it to the lecturer at the end of the module, within two weeks of the last lesson.
