SYLLABUS DEL CORSO

Medicina Legale

2627-4-H4601D019-H4601D051M

Aims

The aim of the module Legal Medicine is to provide students with the tools for understanding the typical aspects of legal medicine and the dentist's medico-legal obligations, also in the role of forensic odontologist, through the analysis of norms and practical cases, including judicial ones.
The specific knowledge of forensic medicine selected and discussed is the basis for understanding the dentist's medical-legal obligations and professional responsibility of the dentist and the odontostomatological team, as required by the civil and criminal laws of the Italian legal system.

Contents

The course provides students with notions about forensic medicine in all clinical and health organizational areas, in tort law assessment and in the health organization. The basics of the Italian State judicial organization and its principal rules of criminal and civil procedure will be presented and the essential legal elements that regulate the relation between the dentist, the institutions and the patients will be discussed.

Detailed program

Definition, scope, generality and methodology of the discipline legal medicine.
The medico-legal methodology: causality and study of causation and medico-legal criteriology, applied to medical malpractice cases.
The national health service in the social context and its relationship with the judiciary system.
Legal, ethical and deontological duties of the dentist.
Informed consent in dental care, consent in minors and disabled patient.
The professional secret in healthcare.

Mandatory reports for the healthcare professional, medical certificate and records, civil and penal expertise.
Forensic pathology: contusive injuries, including transportation injuries in traffic accidents, abuse and maltreatment.
Cause and time of death. Homicide and personal injuries.
Overview of autopsy: judicial and health autopsy, Virtopsy.
Health professional responsibility in civil and criminal matters (Law 24/2017 Provisions on the security of care and the assisted person, and professional responsibility of health professionals).
Tort law and professional liability, the duty of compensation.
Brief hints about private insurances (accident, health, health expenses, life).
Defensive medicine.
Prevention of conflict and litigation in dentistry.

Prerequisites

Dental pathology and clinics

Teaching form

Face-to-face teaching-classroom: all Lectures in delivering type in Italian language; the teacher promotes discussion among students on problems related to dentist malpractice and to modern dentistry, involving students and asking them to report personal experiences and discussing real cases and professional examples also about the evaluation of dental impairment, with the use of interactive teaching material (video lessons and slides; articles, videos, podcasts, case studies (sentences), peer-to-peer learning (student's presentations)), provided by the teacher on the moodle e-learning platform (Virtual learning environment).

All classes are held in-person in delivering type in Italian language: 10 lectures of 3 hours each; the in-person lectures are also videorecorded.

In case of emergency situations (natural disasters, weather warnings (deluge, floods), uprisings, pandemics, etc.): online teaching-classroom with synchronous lectures on the Webex online platform.
