SYLLABUS DEL CORSO

Medicina Interna 2 C

2627-6-H4101D335-H4101D223M

Aims

The course aims to provide students with the essential practical tools to recognize the signs and symptoms of some pathologies, formulate a diagnosis, verify possible differential diagnoses, and correctly plan treatment according to the most up-to-date guidelines.

Contents

Clinical manifestations, differential diagnosis, diagnostic process and therapeutic approach of the pathologies listed under the "extended program".

Detailed program

The main conditions that will be treated are the following:

- Adrenal disease
- Diabetic ketoacidosis
- Electrolyte disturbances
- Anemia

Prerequisites

Knowledge of medical pathology and pharmacology.

Teaching form

Lectures using PowerPoint presentations. Interactive discussion of recently published studies or clinical cases related to specific aspects of the pathologies treated.

Textbook and teaching resource

Harrison's, Principles of Internal Medicine Ed. McGraw Hill, 20' ed.
Goodman and Gillman, The pharmacological basis of Therapeutics Ed. Masson, 13'ed.
Goodman and Cecil, Medicine, 26th Ed.

Semester

Sixth year, first semester.
