COURSE SYLLABUS

General Surgery

2627-6-H4101D336

Aims

The course aims to equip students with the necessary tools and knowledge to make accurate clinical diagnoses of various surgical diseases, to formulate appropriate differential diagnoses among different pathological entities, and to establish the foundations for correct surgical (and non-surgical) treatment indications by providing technical and strategic tools for treating different diseases.

Contents

See syllabus of each module

Detailed program

See syllabus of each module

Prerequisites

Knowledge related to the preparatory courses indicated in the Medicine and Surgery degree program regulations:

- Medical and surgical pathology 1,2,3
- Pharmacology
- Surgical internship 2

Teaching form

The course will be conducted as follows:

- Erogative and Interactive Teaching:
- Multidisciplinary Erogative and Interactive Teaching:
- Supervised Didactics
  Language: ITALIAN

Textbook and teaching resource

- Guidelines and scientific articles provided by the teachers
- Sabiston. Textbook of Surgery. Saunders

Semester

First semester

Assessment method

There are no intermediate tests.
The final examination consists of a written test followed by a mandatory oral examination.
The written test covers the subjects of Vascular Surgery and Cardiac Surgery, in accordance with the methods described in the two teaching modules. Passing the written test is required in order to access the oral examination. The mark obtained in the written test does not influence the oral examination in General Surgery or the final mark.
The oral examination consists of an interview on the topics covered during lectures, as well as topics not addressed in class but included in the syllabus. During the interview, both knowledge of the subject matter and clinical reasoning skills will be assessed.
