SYLLABUS DEL CORSO

Tirocinio Professionalizzante Area Medica 3

2627-5-H4101D339

Aims

The objective of the Medical Area 3 internship is the deepening of the path started in the previous Medical Area 1 internship. which refers to the structures of the medical area and to identify the critical issues. They will also have to prove capable of formulating therapeutic hypotheses and assisting the tutor throughout the management process of the patient admitted to the specialist medical area, including discharge and the necessary administrative and bureaucratic procedures. The internship is carried out with the support of a tutor who guides the student in the knowledge of diagnostic-instrumental-therapeutic and administrative procedures performed directly at the patient's bed.

The additional objective of this internship course is the confrontation of the specialist patient, with the note that the specialty has been chosen by the student and that therefore this internship also has the aim of verifying whether that specific specialist area can then be chosen for the own thesis and possible post-graduate professional activity.

Contents

Carry out a general physical examination, carry out critical reasoning regarding laboratory tests, apply the techniques of interviewing the patient, learn to establish a correct relationship with the patient, learn to use correct criteria of professional ethics, learn differential diagnosis, learn to set up medical therapy and learn about the patient's management paths, including administrative ones.
Particular attention will be paid to gender relatioship with the above mentioned argument.

Detailed program

Perform a complete physical examination of the heart-thorax-abdomen-head-neck-measure blood pressure and

heart rate, oxygen saturation, know the main methods of hemodynamic and clinical monitoring of the patient.
