SYLLABUS DEL CORSO

Farmacologia 2 - 1

2627-3-I0102D905-I0102D923M-T1

Aims

The course provides knowledge of the criteria for therapeutic choice in obstetrics, gynaecology and neonatology.

Contents

Effects and/or complications of drugs on mother, foetus and newborn.

Detailed program

Pharmacodynamics and kinetics in pregnancy and breastfeeding.

Drugs and pregnancy: an overview of teratology.

General concepts of pharmacovigilance; reporting to the ASST Toxicology representative and poison control centers.

Gestational diabetes

Contraceptive methods, emergency contraception, and breastfeeding.

Drugs during pregnancy and breastfeeding: anti-inflammatories, antiemetics, antibiotics, antivirals, tocolytics, and chemotherapy.

Emergency medications.

The role of complementary medicine as a therapy, not an alternative, to support drug therapy
