# COURSE SYLLABUS

# Training in Angiographic Techniques

**2627-2-I0303D009-I0303D041M**

## Aims

Angiography: welcoming the patient and gathering their data and informed consent; correct patient positioning; setting up the exam, the various diagnostic protocols; and performing the exam.

## Contents

The student must be able to collaborate with the interventional radiologist during procedures in the angiography room, understanding the operation of the equipment and the methods for processing and archiving the images produced. They will also be able to apply radiation protection regulations for both patients and operators.

## Detailed program
