COURSE SYLLABUS

Occupational Medicine

2627-1-I0302D004-I0302D015M

Aims

The aims of the course are:

- Acquisition of the basic elements of the Occupational Medicine and of the prevention system in workplaces;
- Knowledge of main aspects of occupational risks, with special attention to the healthcare context, in order to
  prevent occupational diseases.

Contents

The course provides students with useful information to promote health in the workplaces and to avoid behaviors that may cause occupational diseases.

Detailed program

- Introduction to the Occupational Medicine and regulatory framework
- Basic notions of prevention and classification of risk factors
- Duties and responsibilities in the prevention system
- Biological risk
- Physical risks
- Chemical risk
- Other risks in the workplace
- Pregnancy and work: risks for pregnant workers
- Risks for healthcare workers

Prerequisites

Teaching form

Lectures. The teacher promotes discussion among students on problems related to occupational risks, involving students and asking them to reflect on these issues
All classes are conducted in-person in a lecture format: 4 lectures of 2 hours each, held in-person.
The language is Italian.

Textbook and teaching resource

1. Bertazzi PA. Medicina del Lavoro. Milano: Raffaello Cortina Editore, 2013
