COURSE SYLLABUS

Economics & Law for Global Markets

2627-3-E1801M045

Learning objectives

The modules in International Trade and Global Markets provide students with the tools to understand market integration in a global context. The course content includes theories and empirical evidence explaining international trade and trade policies, the mobility of production factors (labor), the behavior of multinational firms (offshoring and outsourcing), and the concept of economic development (growth and structural change).

At the end of the course, students will be able to achieve the following learning outcomes (Dublin Descriptors):

1. Knowledge and understanding

- Understand and explain the main theoretical models of international trade, such as the Ricardian model, the Heckscher-Ohlin model, and models based on economies of scale and product differentiation.
- Comprehend the logic and effects of trade policies (tariffs, subsidies, quantitative restrictions) in both national and global contexts.
- Analyze the role of international law

Contents

Theories of international trade
Commercial policies
Sistema multilaterale di regolamentazione degli scambi internazionali
Diritti di proprietà intellettuale

Detailed program

-Introduction to international trade: data, stylized facts, open issues
-Theories of international trade: the theory of comparative advantages and the theory of inter-industrial exchanges
-Commercial policies: duties, subsidies, quotas, voluntary limitations on exports

- Theories of the international mobility of production factors
  -The behavior of multinational companies
  -Economic development, growth and structural change.

Prerequisites

This course requires basic knowledge of microeconomics

Teaching methods

-20 lectures of 2 hours each conducted in face-to-face delivery mode
-4 interactive lectures of 2 hours each conducted in interactive remote mode
-4 exercise sessions of 2 hours each conducted in face-to-face delivery mode

Assessment methods

Final written exam. Multiple choice questions and open questions, including applied excercises.

The Economics of International Trade and Global Markets modules constitute a single exam worth 8 credits (6+2). The result of this exam will be averaged (weighted) with the Law module to give the final result of the course.
