Investment Banking

2627-2-F1602M013

Learning area

Finance

Learning objectives

The course aims at building a knowledge of investment banking operations and institutions, focusing on the Italian market. Referring extensively to actual structures and transactions, and with the contribution of business experts. The course analyses the most recent trends in the industry, and particularly in debt and equity capital markets, private markets and asset management, insights also on the impact of technological innovation in shaping financial market.

The course develops advanced analytical knowledge and competences, as well as basic technical expertise in investment banking.

Attention is devoted to the development of critical thinking and communication skills, especially through group project works.

Contents

Referring extensively to actual structures and transactions, the course analyses the most recent trends in the industry.

The course is focused on debt and equity capital markets, analysing both traditional and alternative structures and operations.

The evolution in private markets and asset management is considered, with a focus on sustainability.

Detailed program

Investment banking: operations and institutions
The impact of technological innovation: an overview of Fintech and alternative finance
Equity and debt capital market: origination, advisory, selling
Listing process, IPO and SPAC
M&A and LBO: transaction dealing and financing
Private finance: market overview
Leverage, debt sustainability and bond financing
Securitization
Asset management

Prerequisites

Basic knowledge of financial markets and instruments.
Foundations in corporate law and financial market regulation.

Teaching methods

Frontal lectures in Italian.
Teaching material in Italian/English.
Case study analysis, with the contribution of testimonies from business experts.
Practice on M&A transactions.

Assessment methods

Assignments on topics defined by the teacher; the assignments can be performed individually or by small groups; the relevant reports are valued and their valuation contributes to the final vote.
Written exam, consisting of three open questions. Each question is assessed in 30th. The answers to the three questions are equally weighted to determine the mean valuation together with the valuation of the assignments.
No intermediate exam.
